## **Snap: Nexus on acquisition trail**

LONDON (SHARECAST) - Nexus Management surged ahead today after the IT services provider said it was encouraged by demand for its services and is now on the acquisition trail.

Chief executive Roger Richardson said, "In the US we hope to replicate our successful model centred around Maine to other geographical areas, leveraging the infrastructure in place. In the UK, we are actively seeking acquisition opportunities in the IT services market." "This year has already seen our client roster grow by 26% since the start of our financial year. We are encouraged by the demand we are experiencing for our services, and look forward to reporting a successful outcome to the year," added Richardson.
